The chances for the passage of Lecomptou do not look so strong here as they do at a distance. There is no doubt that some bill providing for the admission of Kansas is to pass at this session, but that the Lecompton abomination is to be f-reed on that long afflicted Territory, seems here scarcely probable. Its real friends are much fewer than superficial appearances would indicate. Although it seems probable that nearly every S uth American will vote for it, I doubt whether three of them earnestly desire its success. I understand that Hun phrey Marshall private lyavows that he could sust in hims-if in this District much more easily if he voted against than if he voted her it. The Fire-Esters support it, of c urse, as the most unreasonable and outrageous Pro Slavery measure now practicable; but they would not regret its failure, so that they could Aberaby have one more en roachim at on "Southern Rights" to complain of. Besides these, there are a good many Northern Democrats who must vote on the Main Question as the President requires, yet who would really prefer that the bill should fail, On the whole, I hope it may be

To PRESERVE IRON AND STEEL KNIVES FROM RUST .- Procure some melted virgin wax-the purer the better-and rub it thoroughly over the blades of the knives. After it has dried, warm the knives, and having carefully removed the wax from the surface, rub them briskly with a dry cloth, until the original polish is fully re stored. This will fill all the pores with the unctuous and minute particles of wax which will adhere firmly, and prevent the intrusion of water or moisture, which is the cause of rust. They will retain their bril isney for weeks if used.

Grent Library Offer-Agent Getting Rich!

THE union of EMERSON'S MAGAZINE and PUT-NAM'S MONTHLY has given to the consolidated work a circulation second to but one similar in the country, and has secured for it a combination of literary and artistic talout probably anrivaled by any other magazina is the world. Buring the first month, the sales in the trade and demand from subscribers are \$0.000 copies, and the numbers already issued of the consolidated work are universally conceded to have surpassed in the reliness of their literary contents, and the beauty and profuseness of their pictorial illustrations, any magazine ever before issued from an American pross. Encouraged by these evidences of favor, the publishers have determined to commone the new volume in January with still additional attractions, and to offer such inducements to subscribers at cannot fail to place it, in circulation, at the based of American magazines. With this view they now announce the following aplendid progratinue. They have purchasol that superb and costly steel-plate angraving. JOHN EFFINGER JOHN EFFINGER

The success which our agents are meeting with is almost astonishing. Among the many evidences of this fact, we present the following from one of our agents already in the field:

"I have now been at work canwassing on your Magarine one week, and am delighted with the basiness. It is different from canwassing for any thing else I evertied. I am sive to get a subscription in every family where they can rake together three dollars. I am never received with indifference any where, for the first thing I do is to unrell my engraving before I let anybody know what I am after, and thus I get them inderested before they know what a spisudid after I am going to take them. Sometimes they ask my price for the engraving and I tell them \$3, and when loffer them the ongraving and Magazine one year for three dollars they are porfectly astonished. I did not get to going well for the first two or three days:

The lat day I got. 7 subscribers.

The 4th day I got. 9 subscribers.
The 6th day I got. 17 subscribers.
The 6th day I got. 17 subscribers.
The 6th day I got. 17 subscribers. N. B.—The price in Great Britain of the five Periodicals above named is \$31 per annum.

As we shall never again be likely to offer such inducements as those here presented.

Now is the Time to Subscribe. With such inducements as we offer, anybody can obtain subscribers. We invite every gentleman out of employment, and every lady who desires a plea-gant messey making occupation to apply at once for an agency. Applicants should inclose 25 cents for a spe-cimen copy of the Magazine, which will always be forwarded with answer to application by return mail.

THE NEW YORK

STRAM SAW-MILL

AND MACHINE COMPANY. CAPITAL \$250,000.

This company has been organized with the above aprilal for the purpose of supplying the demand for COMBINATION

PORTABLE STEAM SAW-MILL. AND IMPROVED MACHINERY.

PORTABLE STEAM SAW-MILL.

AND IMPROVED MACHINERY.

They have purchased the entire machinery business her tofore carried on by J. M. Emerson & Co., also the Montgombry Works at Yonkers, on the Hadson, near this city, and with the experience and facilities combined in its organization are prepared furnish machinery of all kinds at more liberal rates than has ever been offered at any other establishment.

THE COMBINATION NAW-MILL was patemed Oct. 1756, and is now generally acknowledged to be the cheapest, most practical, and efficient lumber manufacturing machine in the world. A large number of them are in successful operation in different sections of this country, Canada, Cuba, and South America, and wherever their merits have been tested they are being adopted by lumber manufactures in preference to all other mills.

The following letter expresses the general opinion of these who are using the Combination Mill:

Messrs, Exgasos & Co.—Gentlemen: I have tried the raw mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as thick as my little finger, which was much more than amficient to supply the holler. We are able to eut 3, colo feet of lumber in 12 hours, with something less than one cord of wood. It is the very thing we have so much necesed in our country for a long time. With a little trouble and expense, we are able to move it from five to aten miles per day, and set it up in the heart of the timber, which saves the great burfue on of hauling the logs a long distance to the mill.

Yours, respectfully, JESSE KERB, JR.

The Companyhave parchased LUND'S PATTENT FEED arrangement, which illustrates and describes in the Scientific American for Oct. 24. This adds great by to the effectency of the Mill.

The Combination mill, with all the recent improvements, and sleam power of 13 horses, is capable of sawing from 3,000 to 4,000 freet in twelve hours, and is sold for 1,6

Pailles for manufacturies, and all kinds of Mill-wright Work.
This Company are selling in great numbers a Patent Conical Burr-Stone Mill, for flour, even ment, and all kinds of feed, which is pronounced by experienced millers, both in this country and kurope, the best mill ever constructed. It will grind more grain in the same time, and with half the power, of any mill of the same price in the market.

We also furnish otherstyles of Grist-Mills, when required.

The undersigned are also publishers of The United States Journal, A large and magnificent illustrated monthly newspaper, devoted to MECHANICS, AGRICULTURE, LITERATURE and AMUSEMENT.

In addition to its usual attractions, which have already given it a circulation of nearly 100,000 COPIES permouth, it will hereafter contain a complete record of all new and valuable Mechanical and Agricultural improvements, embracing a large amount of practical information from experienced writers in these specialties than a y other publication in the world.
